

## Letter of Intent

Dear Ms. Murphy,

I am Sagarika Samavedi, a Junior at Interlake High School. I would like to be part of the State Science Olympiad as a Student Advisor. I have participated in Science Olympiad since my Freshman year and have no hesitation in saying this has been my favorite club! This year I am the President of the Science Olympiad club at Interlake High School and we had four teams participate in the competitions. As a Student Advisor, I would love to share my experiences and encourage all students to participate in Science Olympiad with the same enthusiasm and passion that I have had for this competition.

While I cherish memories of winning each of my medals in study and build events, the best part of Science Olympiad for me has been working together with students from different grades and helping each other while we prepare for the competition. This year, I have also coached my local middle school teams for Science Olympiad and I am very happy that they plan to be part of this club as they join high school.

I would love to be a State Student Advisor and continue to make Scioly a place where we all love to compete, learn and make friendships that last a lifetime!

Thank you and I look forward to working with you,

Sincerely,  
Sagarika Samavedi  
Class of 2019  
President  
Interlake Science Olympiad Club
